LinkedIn · GitHub Portfolio **Open to Internships**

Professional Summary

Diploma in Information Technology student with strong academic performance and hands-on experience in cloud computing, networking, IoT, and cybersecurity. Motivated, curious, and adaptable, eager to apply problem-solving and innovative thinking to real-world IT challenges while continuously expanding knowledge in emerging technologies.

Education

Diploma in Information Technology — Belgium Campus iTversity
Expected Graduation: 2027

- **Academic Performance:** 21 Distinctions | Weighted Average: 71.2% (290 Credits Achieved)
- **Relevant Coursework:** Cloud Computing, Networking, Cybersecurity, Internet of Things (IoT), Operating Systems, Database Development, DevOps, Web Programming
- **Key 3rd-Year Results:**
    - Operating Systems 361 (80%)
    - Database Development 261 (75%)
    - Ethical Hacking 361 (74%)
    - Network Development 361 (74%)
    - DevOps 361 (72%)

National Senior Certificate — Issued by Umalusi (December 2023)

- Met the minimum requirements for admission to diploma or higher certificate study.
- **Subjects:** English Home Language (Level 3), Afrikaans First Additional Language (Level 3), Mathematics (Level 5), Life Orientation (Level 6), Electrical Technology Power Systems (Level 5), Engineering Graphics and Design (Level 5), Physical Sciences (Level 3).

Technical Skills

- **Cloud & Infrastructure:** Cloud (Azure/AWS), Docker & Containers, DevOps, Chef
- **Networking & Security:** Networking, Cybersecurity, Linux / Kali
- **Development & Data:** Python, Web Programming, Databases, PowerShell
- **Hardware:** IoT

Featured Projects

Automated System Monitoring Tool
PowerShell-based monitoring with CPU tracking, service management, and automated HTML/CSV reporting (OPS262 — 84% Distinction)

Human Detection Probe
Arduino PIR sensor system with buzzer/LED alerts and I2C LCD status display (IOT261 — 77% Distinction)

Ransomware Simulation
Python ransomware with XOR encryption, password protection, and one-click activation (EHA361 — Exam Project)

DevOps Toolchain Implementation
Docker containerization, Chef configuration management, and Git collaboration workflow (DOP361 — 72% Distinction)

Additional EHA361 milestones (Keylogger, Buffer Overflow, Privilege Escalation) available on my GitHub.
